

Climate Change Commitment

The Wem Climate Change Commitment is a major initiative spearheaded by Wem Town Council to encourage organisations and individuals in the Wem area to commit to do all they can to tackle climate change.

We acknowledge that climate change will profoundly influence environmental, social and economic conditions in the Wem Area.

We commit to

- Take action to mitigate and adapt to climate change
- Acknowledge that action must take place at all levels – local, county, national and international
- Helping the area to achieve the national goal of reducing Co2 emissions by 60% by 2050
- Supporting improving ways to co-ordinate action on climate change across the region.

We agree to

- Put climate change at the heart of our internal decision-making process
- Take all practical steps to limit CO2 emissions and respond to the challenges imposed by the impacts of climate change.
- Work with others to share progress, challenges and successes.
- Encourage others to take action to ensure that Wem Area becomes a champion for climate change activity.
