

Christmas Light Competition – Design a Christmas Light

In 2025 £800 was donated by Wem Rotary and £800 from The Grocott family towards this project.

The 2025 light was very well received and the plan was always to run the competition for 2 years.

After problems with the original lighting company a local company had to be found to build the light and the 2025 light cost more than anticipated. There is currently a balance of £700 remaining from the original donations for year 2.

A quote has been submitted by the company who designed the 2025 light and due to the amount of work involved in designing a bespoke light in order to run the competition again in 2026 there is a shortfall of £500.

Decision needed

The Council are asked to agree to allocate £500 from the Christmas Lights budget to allow the running of this competition in year 2.
