

Penny O'Hagan,

I am writing on behalf of Wem Cricket Club as we progress an important community project to install new astro-turf practice nets. As a club, we play an active role in supporting sport and wellbeing within the town, with our facilities regularly used by the local high school, junior teams, and various community groups.

The total project cost is approximately £60,000. So far, we have raised around £25,000 through crowdfunding, Sport England, and support from Shropshire ECB. We are now seeking further funding and partnership opportunities to help close the remaining gap and ensure that the project can move forward.

Given the Town Council's commitment to supporting grassroots sport, youth activities, and community facilities, we would be extremely grateful for any guidance, available funding streams, or potential support that the Council may be able to offer. The project will deliver long-term benefits to children, young people, and the wider community by providing safe, modern, and accessible training facilities.

I have attached the Business Plan and our Sponsorship & Funding Request document for your consideration. I would be very happy to meet or discuss the project further at your convenience.

Thank you for your time and any assistance you may be able to provide.

Kind regards,

Andy Mortimer
Wem Cricket Club (Project Lead)
