

Outlined below is the response received following a request for an update on the Traffic Impact Assessment that was been requested, by the Town Council, to investigate the feasibility of the implementation of a one way system around Wem.

On receipt of the email received below a request was sent asking for the following information

details of exactly what the surveys mentioned in your email cover and a copy of the works specification for the surveys issued by SC engineers to the consultant WSP and their detailed response.

At the time of publishing the agenda this has not been received.

Clerks Recommendation –this matter is not considered until the requested further information has been provided.

Subject: RE: Feasibility study

Hi Penny,

I am aware that the traffic impact assessments were to cover the following:

- The creation of a clockwise or anti clockwise one way system around the town.
- The reversal of the existing one way priorities on Chapel Street/Leek Street to enable access to the main car park from Mill Street.
- The management of traffic around Maunds Corner.

I am just waiting for WSP to get back to me with the fee proposal which will outline the extent of the assessments.

I will send you these details as soon as I have them.

Kind regards, Sarah

Subject: Wem Highways Improvements

Hi Penny,

Apologies for the delayed response. As you are probably aware there has been some changes in Traffic. Phill is currently off work and Kevin has been moved to other projects.

I am afraid I am playing catch up on this project but I believe there has been discussions with Kevin and Phill to gather some traffic data in the first instance.

We have had a quotation from WSP for the surveys which I believe is in the region of £20k to and that an agreement in joint funding from the TC will need to be sought in order to progress. Please come back to me directly and we can look to move this forward.

Kind regards Sarah Cosgrove, Community Project Manager
