

Proposal received from Cllr Drummond 2.11.20

Following on from the constructive debate and resolution on minute point 266/20 Outstanding Highways Issues of our October meeting, I feel that this Town Council should take a positive lead in progressing this item whilst there appears to be some sympathetic consideration from Shropshire Council Members and Officers.

After all, the issues are directly the concern of the people of Wem and we are their representatives and therefore in the strongest position to pursue with the Highway Authority the feasibility studies based on the measures consulted on in 2017.

I therefore propose that, similarly to other major projects we are dealing with currently, a Traffic Measures Working Party is created consisting, at a minimum, of the Mayor, Shropshire Councillors Dee and Mellings and acknowledging my local authority and highway engineering background, myself, to liaise with SC Councillors and Officers, their appointed consultants and to also lead the necessary community consultations."
