- That the contractor who installed the original metal fencing be asked to quote to continue the fencing as he knows the site and is aware of its sensitivity and constraints.

b) to consider request received to install a path to grave 501.

It was explained that grave 501 was in row 24 and row 25 already had several graves located in it. Therefore, it was not possible to place a path in the location identified on the plan provided to support the request for a path as it would run over graves. It was explained that due to the need to have a buffer of 1 row during path construction works to ensure no disturbance of recent graves the most appropriate location for a new path would be between rows 26 and 27.
